IZAR@MOBILE 2 FOR WINDOWS™

METER DATA MANAGEMENT

APPLICATION

IZAR@MOBILE 2 is a software designed for fast and efficient mobile reading of system components and multi-energy smart meters. Its ergonomic and tactile interface makes it intuitive and user-friendly. Its map view of the meters allows precise guidance during the reading of the tour.
To take full advantage of the software's features, Diehl Metering supports the following Windows device Microsoft Surface Go 2. It can also works with other Windows-based devices such as laptops and tablets.
Connected to the IZAR PLUS PORTAL or IZAR@NET 2 management software, IZAR@MOBILE 2 offers many enhanced features such as multi-tours planning & management and remote or local data transfer.
With its XLSX interface to import or export data, it operates completely independently as well.

FEATURES

- Mobile walk-by or drive-by reading of all types of meters (water, heat, cold, gas and electricity) and heat cost allocators
- Reduced reading costs
- Accurate electronical transmitted values
- No customer claims
- No appointments necessary
- Map display of meters location
- On-site configuration of meters and system components
