

Space Optimized Lavatory (31")

Higher potential for additional revenue and passenger comfort

DIEHL
Aviation

Climbing higher.
Together.

Characteristics

The new 31" lavatory brings more space into your cabin and allows a more flexible cabin utilization, as well as bringing with it the potential for additional revenue. Despite its narrow footprint, the space-saving lavatory retains all the features of a standard lavatory. Thanks to optimized room geometry, passengers can make use of the facility as usual, without any restriction of movement. It can be customized and supplemented with versatile features.

Benefits

- Very small footprint (reduced from 36.5" up to 31")
- Unrivalled shoulder room
- Creates additional revenue space
- Enables installation of additional seats (dependent upon on seat pitch)
- Wide range of options available
- Integration of non-touch functions possible
- Easy door installation with smooth door motion possible
- Configurable to operators' business model

Space Optimized Lavatory (31")

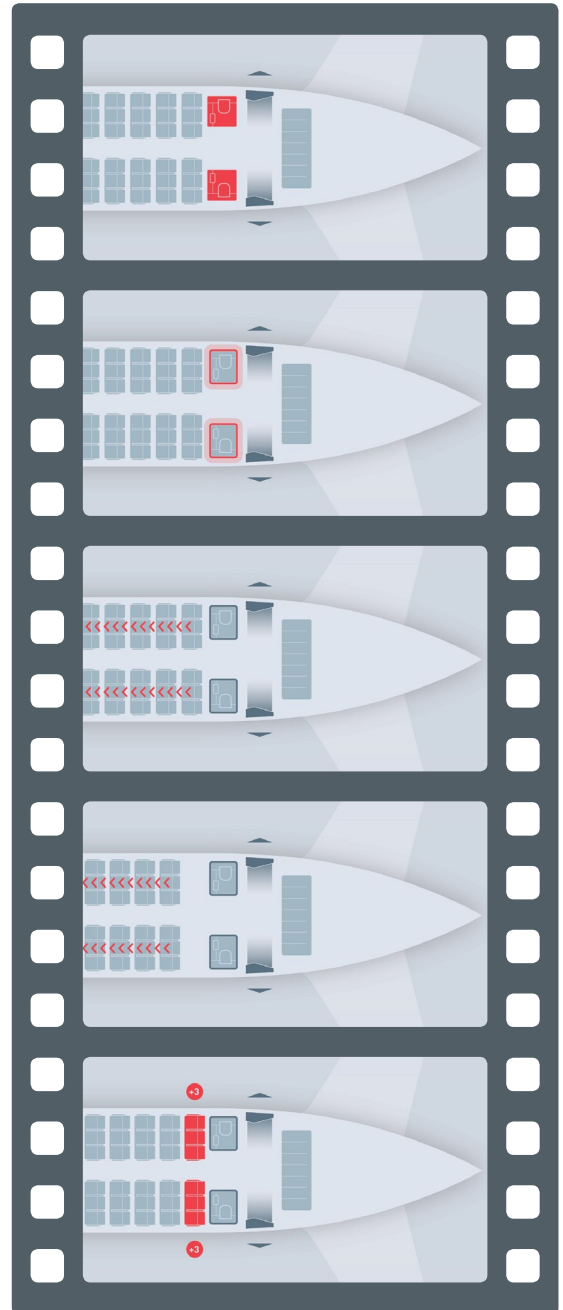

Higher potential for additional revenue and passenger comfort
