

Environmental Policy of Diehl Defence

Environmental thinking and acting is an integral part of our daily work. We conduct preventive corporate environmental protection by already taking environmental aspects into consideration in the product engineering process. Our environmental policy provides the basis for defining and assessing environmental targets to achieve integrated environmental protection which means environmental protection is an integral part of all our activities.

Diehl Defence undertakes to comply with applicable laws and regulations as well as other binding obligations and to continuously improve the existing environmental protection system so as to enhance environmental performance and to protect the environment against harmful effects.

Environmental policy guidelines:

- The environmental impact of our products and production procedures should be as little as possible.
- We minimize emissions in exhaust air and waste water.
- We regard environmental protection as a management task.
- We want to promote a sense of environmental responsibility among all employees.
- In the field of environmental protection, we cooperate with the public authorities on the basis of mutual trust.
- Together with the authorities, we keep emergency plans up to date so as to keep emissions low in the case of an accident.
- We verify the expertise and reliability of environmentally relevant suppliers and service providers.
- Both our environmental protection measures and an open information policy towards the public promote trust.
