

Software License Conditions Applicable Worldwide (Except Germany)

These Software License Conditions constitute the terms and conditions under which **Diehl Metering GmbH**, Industriestrasse 13, 91522 Ansbach, Germany (hereinafter referred to as "DM") grants Licensee a limited license to use IoT Gateway Software.

1. Software

Subject of this Agreement is the IoT Gateway Software as described in the Product Data Sheet attached to this Software License (hereinafter referred to as "Software").

2. Limited License

2.1 Subject to the acceptance of the terms and conditions set forth herein, DM grants Licensee a non-exclusive, limited license to use the Software. The license

- (i) is restricted to IoT GATEWAY products in accordance with the numbers of devices agreed separately between the Licensee and DM;
- (ii) is geographically unrestricted with the exception that the software may not be used contrary to export control regulations as set forth under <https://openjdk.org/legal/tou/terms#:~:text=Export%20Restrictions%2FLegal%20Compliance,.other%20applicable%20laws%20or%20> regulations.
- (iii) is conditional on the payment of the license fee as agreed between DM and Licensee and the license will lapse immediately as soon as payment is in arrears until the Licensee makes the payments due from him;
- (iv) is limited to a copy of the Software as installed on the IoT Gateway which is in Licensee's immediate possession and may not be installed on any other computer system;
- (v) entitles Licensee to revise the Software, limited to the necessary maintenance or reinstatement of the agreed functionality of the Software;
- (vi) does not entitle Licensee to sublicense, hire out, lend or lease the Software in any way or to make the Software available for downloading by the public or any third parties (e.g. hosting);
- (vii) entitles Licensee to sell or transfer the Software together with the gateway to a third party provided that this third party explicitly accepts this Software License Conditions and that Licensee transfers the complete Software, including all data media and copies as well as all material and documentation. The transfer must include the current version and, in the case of updates, also all earlier versions. DM has to be notified in writing of such a transfer together with the name and address of the third party;

- (viii) does not entitle Licensee to alter or modify the Software in any way or to use the Software to create derived software;
- (ix) does not entitle Licensee to reverse engineer, dismantle, de-compile or disassemble the Software or to obtain any Information by dismantling or processing the Software beyond scope of use explicitly defined herein.

3. Updates, Upgrades and Changes of the functionality

- 3.1 DM may change the Software and amend its standards functionality at any time, resulting in an incremented Version Status (e.g. Version 2.1 receives a Major Update, Version Status is incremented to 2.2, Version 2.1 receives a Minor Update and is incremented to 2.1.1). Minor changes will become part of the Software and the license granted in Section 2 will cover such new Version Status automatically and without additional charge. DM will inform the Licensee of the new Version Status and provide a summary of the changes in a changelog together with the new Version Status of the Software by means deemed appropriate by DM.
- 3.2 After notification, the update will be installed automatically or provided to Licensee's update server. In case it is provided to Licensee's update server, the Licensee shall be responsible to download/install the new Version Status independently. If the Licensee does not install individual new Version Status properly, the warranty under paragraph 7 shall be excluded insofar as the problem/ defect would not have occurred/ would have been remedied with proper instalment of the new Version Status.
- 3.3 Any support or services provided by DM will be provided only for the latest Minor Version of the latest two Major Version Status. DM does not guarantee backward compatibility for more than the last two Major Version Status.
- 3.4 DM may decide to release a Software Version with Major Changes or develop new functionalities or features by creating add-on modules to the Software. Such Software with Major Changes result in an incremented Version Status (e.g. Version 2.1 receives a Major Update, Version Status is incremented to 2.2), add-on modules have individual Version Status, both require a separate/ amended license according to the then current conditions.

4. Software Distribution and Access

- 4.1 DM will provide the Software via the Diehl Metering update server either directly to the Gateway or in case the customer prefers to push the updates from his local update server, DM will provide the Software and updates to the customer.
- 4.2 Access to the functionalities of the Software may require username(s) and password(s), which may be provided by DM or created or changed by Licensee or a Third Party. Licensee is aware that any disclosure of these usernames and passwords may lead to an unauthorized use or abuse of the Software and therefore is obliged to keep any usernames and passwords strictly confidential and disclose it only to authorized personnel within its own organization which have a need to know such information to assure the possibility of using the Software in compliance with these License Conditions.

- 4.3 Licensee shall inform DM immediately in case he has knowledge or reason to suspect that unauthorized persons have come into possession of usernames or passwords. DM is entitled to block the respective account in such case.
- 4.4 DM is not liable for the consequences of any unauthorized access to or abuse of the Software resulting from a disclosure of usernames or passwords to any unauthorized persons, unless such disclosure was culpably and solely caused by DM.

5. Set-up and Installation

To use the Software it may be necessary to set-up certain installations within the Software and to implement certain changes, customizations or interfaces to connect Licensee´s system with the Software. Such set-up and installation of the Software will be carried out by Licensee at his own expense; any support of DM will be conducted on the basis of DM´s standard hourly or daily rates and is subject to a separate written agreement between Licensee and DM.

6. Ownership and Title

- 6.1 DM retains ownership and all rights to the Software, including title and intellectual property rights. No right, license, or any entitlement shall be deemed to be granted except the license explicitly granted to Licensee in Section 2.
- 6.2 The reference to copyright is installed on the software. The Licensee may only use or dispose of the Software together with the reference to copyright. This must also remain on or be added to any copies of the Software made. Neither the reference to copyright nor the Software's registration number may in any way be changed or removed.
- 6.3 Licensee shall not use any information obtained in connection with the Software or the License to take any action against intellectual property rights or intellectual property right applications from DM or to facilitate such actions by third parties.

7. Warranty

- 7.1 The Software is intended for use as described in lit 2 and is provided "as is", without any guarantee to be suitable for Licensee´s specific purpose and to be compatible with any other software or hardware used by Licensee. Rights in case of defects shall be excluded in the case of minor or immaterial deviations from the agreed or assumed characteristics nor in the case of just slight impairment of use. Product descriptions shall not be deemed guaranteed unless separately agreed in writing.
- 7.2 In case of defects of the Software significantly impairing described or advertised functions, DM will remedy such defect by delivering a respective update or providing the Licensee with the documentation for a workaround. Licensee may not object that the update includes not only the remedy of the defect but also additional changes to the Software to which he attaches no importance or which he does not want for other reasons. Licensee is required to accept this situation, unless it considerably affects the purpose for which he uses the Software.

- 7.3 Licensee's rights in case of defects are limited to 24 months and the period shall begin on the date of delivery of the first copies of the Software. In respect of the delivery of new versions, the period for such deliverables shall in each case begin on the date of delivery.
- 7.4 Any claims for damages are subject to the limitations set forth under Section 8.
- 7.5 If the defect is caused by the defective product of DM's supplier and the supplier does not act as an assistant in performance of DM, rather DM is merely passing on a third party product to Licensee, then Licensee's rights in case of defects shall at first hand be limited to the assignment of DM's rights in case of defects against its supplier. This shall not apply, insofar as the defect is caused by improper handling of the supplier's product for which DM is responsible. If Licensee is unable to assert his rights in case of defects against the supplier out of court, DM's subsidiary liability for Licensee's rights in case of defects shall remain unaffected.
- 7.6 DM shall not be liable for any defects caused by alteration of the Software, improper use or operation or use of an old Version Status as set forth in Section 3.2.

8. Liability

- 8.1 DM is not liable for any indirect, incidental, special, consequential or exemplary damages (including damages for loss of profits, expected cost savings, goodwill, use, or data) resulting from any defect of the Software or emerging otherwise in the context of the use of the Software.
- 8.2 Unless caused intentionally by DM any liability of DM in connection with the license provided in Section 2 shall be limited to the license fee paid by Licensee for one calendar year except for damages to life or health of a natural person.

9. Confidentiality

- 9.1 Licensee shall treat with the strictest confidence any information to which he has access during the business relationship and that is marked confidential or which Licensee has reason to suspect that it may be confidential under the care of a prudent businessman ("confidential information"). Licensee shall not disclose such information to third parties, and shall use it exclusively for the purpose for which it was provided, and for no other purposes, and will only make such information accessible to employees who require such to fulfil the aforementioned purpose, and shall be bound to confidentiality in the same way. Upon termination of the business relationship, all confidential information (including all copies) will be returned or destroyed at the supplier's discretion.
- 9.2 Any and all information disclosed in connection with the Software remains the property of DM and shall not be copied and/or reproduced in any way without the prior written consent of DM. Upon expiration or termination of the License all confidential information shall be either returned to DM or be destroyed.

10. Data Protection

- 10.1 Licensee herewith agrees that DM collects and uses technical and statistical data including calculations and results based thereon insofar as these data are not personal data in the meaning

of Article 4 of the EUDATAP, to update, upgrade, adapt and customize the services and products offered by DM as well as for statistics, analysis, evaluation, quality and monitoring purposes. DM ensures that the identity of Licensee is protected when using such data.

- 10.2 The Software may process Personal Data for the use by Controllers or Processors on behalf of Third Parties as Controllers (all terms as defined in the European General Data Protection Regulation). In that case details are set forth in the data protection agreement, which will be agreed between DM and Licensee separately.

11. Third Party Licenses

- 11.1 The source code of the Software consists of software components, which are leased by the rights holder to any number of users without a license fee and with a right to edit and/or distribute the software on the basis of a license or other contractual regulation ("Open Source Software"). The license conditions applicable thereto are part of this agreement and are available within the License-Section of the welcome page of the Software. The Licensee unconditionally accepts the license conditions of the Open Source Software listed as described above and will comply with any obligations set out in these license conditions. The list of OSS libraries can be provided through DM upon request.
- 11.2 Licensee is aware that Updates according to paragraph 3 may contain further Open Source Software which will be included in the listing as described above at the time the respective update is provided. With acceptance of the "Check Box" provided together with each update and installation of the respective update the Licensee accepts such additional license conditions as part of this license agreement.

12. Amendments

DM may amend these terms and conditions with a new Major Version Status.

13. Applicable Law and Disputes

- 13.1 These License Terms shall exclusively be governed by Swiss Law to the exclusion of the United Nations Convention on the International Sale of Goods (CISG) and International Private Law.
- 13.2 Any disputes arising out of or in connection with these License Terms shall finally and bindingly be decided by arbitration according to the Rules of Arbitration of the International Chamber of Commerce (ICC). Place for the arbitration proceedings shall be Zurich, Switzerland. The language to be used shall be English.
