Overview Company Site

Work Rules for external Companies and their Employees

Basic Information

Work Rules for external Companies and their Employees

This presentation "Work Rules for external Companies and their Employees" is part of the terms and conditions of Diehl Aviation Laupheim GmbH, therefore mandatory.

All authorized works, concerning the area-specific conditions, shall be discussed with the coordinator before performing.

Inspections and Regulations

Read up on the applicable regulations BEFORE taking up employment on the site. This particularly refers to regulations of safety, health, environmental and fire protection.

The contractor is bound to instruct and supervise the designated employees. This work rules also applies to subcontractors and consortia designated by the prime contractor.

These shall be reported to the customer (procurement/coordinator) under specification of address, contact person and the responsible accident insurer (BG).

Basic Information / Authority

Work Rules for external Companies and their Employees

Coordinator

The Diehl Aviation Laupheim GmbH appoints a coordinator in order to coordinate the tasks and to avoid mutual hazard. In this context the coordinator has authority over the contractor and their employees. The coordinator has the right to request all required documents like hazardous good register, work instructions and the job schedule particularly.

The coordinator's authority <u>does not</u> excuse the supervisors of the external company (contractor) from their responsibility and the compulsory control of their employees and subcontractors.

Basic Information

Work Rules for external Companies and their Employees

Company Working Hours

Beginning and end of the working hours, as well as breaks, shall be adapted to the company working hours of the site. Exceptions only in coordination with the coordinator.

Brought-in Items

Brought-in items, materials and tools that are required to perform the task, by mutual agreement shall be secured against unauthorized use and purloin when leaving the working place.

Hazardous goods shall be notified!

Factory Security

Work Rules for external Companies and their Employees

General Information

The instructions of the factory security personnel shall be followed.

Identification Card

Access to the site only with an identification card for external companies/visitors. It shall be visibly worn for the duration of the task on the company site. The identification card is nontransferable. An ID card loss shall be reported to the factory security at once. After finishing the task, the plant ID card shall be returned unrequested.

Visitor's accompanying Person

Visitors shall be accompanied by an employee of Diehl at any time.

Inspections

In order to protect the company's and personal property, inspections are performed, including brought-in items. External company's vehicles on the site are controlled by the factory security.

Factory Security

Work Rules for external Companies and their Employees

Duty of Confidentiality

Maintain silence towards third parties about all business information of Diehl Aviation Laupheim GmbH and its business partners you may get to know while your task on the site, even after the termination of the task.

This also applies for interoffice information like technical and constructional facilities, manufacturing methods and production processes.

All documents (e.g. technical protocols, construction plans, etc.) shall be secured against unauthorized acknowledgement, mainly if these are edited or stored outside of Diehl Aviation Laupheim GmbH.

At the job end, all documents shall be returned, respectively shredded properly, confirmed in writing. Maintain silence about the results of the services performed.

Dangerous Tasks

Work Rules for external Companies and their Employees

Instruction / Approval

Before performing dangerous tasks, get a permission by the coordinator. This includes for example:

- Welding, soldering and cuttings works with naked flame and handling inflammable or other hazardous substances (e.g. adhesives for ground floors)
- 2. Driving on narrow spaces, containers, pits, as well as supply and disposal sewers
- Works on fire-extinguishing installations, alarm systems and warning systems
- 4. Works in areas that are protected by automatic fire-extinguishing systems
- 5. Works on containers and ducting
- 6. Works on electrical systems

Dangerous Tasks

Work Rules for external Companies and their Employees

- 7. Works in flammable and explosive areas
- 8. Utilization of hazardous substances (e.g. chemicals) and operating hazardous systems (e.g. laser, X-ray installations, etc.)
- 9. Excavations like constructing excavation, pits and shafts
- 10. Works on truck-mounted cranes
- 11. Works on elevated working positions
- 12. Dust-developing works in areas with automatic fire-extinguishing systems
- 13. Works in security zone 3 air freight packaging

Work Equipment

Work Rules for external Companies and their Employees

Machines

Machines, tools, devices and other production facilities shall apply to the relevant regulations and be in a reliable condition.

Electrical Facilities/ Connectors

In case of works at or near to current-carrying installations or facilities, the responsible department shall be contacted. The department decides on the following actions.

Work Equipment

Work Rules for external Companies and their Employees

Company Facilities

Using company facilities, machines, raw materials, etc. is only permitted with a permission. The coordinator is the responsible contact person.

Data Processing

Before using DP devices (PCs, work stations, equipment, etc.), this shall be coordinated with the coordinator.

Hazardous Goods, Fire and Explosion Protection

12

Work Rules for external Companies and their Employees

Danger of Fire and Explosion

Handling naked flame, fire and sparking tools is prohibited in areas with an increased risk of fire and/or explosion.

Exceptions are declared as hazardous works and shall be approved by the coordinator.

Carelessly triggering or neglecting to report a reconnection of a fire protection system, can lead to claims of compensation.

Keep in mind that high dust works may trigger fire alarm systems.

Using Hazardous Goods

Before using hazardous goods, the coordinator shall approve them. For this, present the relevant documents, like **safety data sheets**, to the coordinator.

Environment Protection

Work Rules for external Companies and their Employees

Disposal of Waste and Residues

For wastes and residues that are a result of brought-in materials of the performed works, the contractor is considered to be the waste producer and therefore is responsible for the waste disposal.

Water and Soil Protection

Water endangering substances (e.g. oils, solvents, paint, etc.) must not get into the canalization, respectively soil, in any case.

Construction and Installation Works

Work Rules for external Companies and their Employees

Elevated Working Positions

Use safety scaffolds, safety nets or safety harness for tasks on elevated, movable working positions, if the required tasks do not allow security by rails.

Safety

Construction sites, excavations, pits, sewers, floor openings, etc. shall be properly secured in coordination with the coordinator.

Works in Airport Areas

The relevant statutory provisions and requirements, in particular Air Traffic Act, shall be followed. This includes, amongst others, placing and lighting obstacles.

Construction and Installation Works

Work Rules for external Companies and their Employees

Civil Engineering Works

Before beginning civil engineering works, the executing company shall gather information on the location of current-carrying conduits, gas conduits and oxygen conduits at the responsible department/building authorities.

Follow the instructions of these departments/building authorities.

Airworthness

Work Rules for external Companies and their Employees

Security zone 1 (SZ1) factory premises

The contractor is obliged to maintain the existing factory safety.

Unauthorized persons shall not be allowed access to the factory premises.

Security zone 2 (SZ2) Hall 22 / logistics area

The contractor shall comply with the following directives:

- For all work, the contractor shall deliver an avis to the Air Safety Officer at least one week beforehand
- The manipulation of entrances (doors, gates, windows,...) is forbidden
- Unauthorized persons are to be denied access

Airworthness

Work Rules for external Companies and their Employees
