

CORONA MCI 108

Multi-Jet Meter | Wet Runner

DIEHL
Metering

APPLICATION

Domestic water meter

FEATURES

- ▶ Modular multi-jet domestic capsule meter with inductive scanning (without magnetic influence)
- ▶ System capability, with standard applicable pulse output 1 l/pulse (inductive). CORONA MCI can be externed in any way - with IZAR RADIO COMPACT 868 I (radio module) or IZAR PULSE I (pulse transmitter)
- ▶ Only the complete measuring insert needs to be replaced regularly at the end of the calibration period - the meter housing remains fitted in the pipeline
- ▶ With composite screw head. Advantage: lower adhesion, no deposit, lower weight
- ▶ For easier reading, the zero point of the dial can be adapted to the direction of flow by turning the measuring capsule 90° to either side during installation
- ▶ A DIN DVGW-approved non-return valve can be installed in the meter housing as option
- ▶ Mounting position - housing horizontal: horizontal (R 40 - 160) and vertical (R 40)
- ▶ Mounting position - housing rising pipe: vertical (R 40 - 160)
