

Diehl Brass Solutions receives the silver medal in the EcoVadis Rating

The company is rated for its sustainability performance by EcoVadis and receives the silver medal. This rating reflects Diehl Brass Solutions' commitment to meeting the highest standards in the areas of environment, labor and human rights, ethics and sustainable procurement.

This year, Diehl Brass Solutions was once again recognized for its sustainability performance by EcoVadis, one of the best-known platforms for sustainability ratings, and rewarded with the silver medal. This puts Diehl Brass Solutions in the top 15% of companies rated by EcoVadis.

"We are very pleased with this great result, as it reflects our continuous commitment to sustainable corporate development. I would like to thank all employees who have made this success possible," says Heinz Strobl, CEO of Diehl Brass Solutions, about the positive assessment.

Lisa Pfürtsch, Health, Safety & Environment Manager at Diehl Brass Solutions, adds: "The silver medal from EcoVadis is a significant achievement and a confirmation of our continuous efforts to embed sustainability in all our business practices. We continue to work on improving our processes and setting new standards to fulfill our responsibility towards the environment and society."

EcoVadis rates companies in the areas of environment, labor and human rights, ethics and sustainable procurement. The ratings are based on a point scale from 0 to 100 and provide detailed insights and feedback to help companies improve their sustainability strategies and achieve their sustainability goals. To date, over 130,000 companies worldwide have been rated by EcoVadis.

Diehl Brass Solutions has set itself the goal of further expanding its sustainability activities. By using renewable energy sources, Diehl Brass Solutions is already achieving more climate-friendly production. The use of green electricity and heat recovery play a key role in this. With photovoltaics (PV) on the hall roofs, green electricity is to be generated and used specifically for the energy-intensive operation. The first PV systems will be installed this year.

About Diehl Metall:

About Diehl Metall: Diehl Metall is a Corporate Division of the Diehl Group founded in 1902 (sales: 3.5 billion euros, employees: 16,550) and has its headquarters in Röthenbach a.d. Pegnitz near Nuremberg. The company offers a broad spectrum of innovative products and technologies in the area of metal processing. In a global production network with locations in Europe, Asia, South America and the US, Diehl Metall develops application-oriented solutions for international customers. The company assumes responsibility in the area of climate and resource protection, and places great value on recyclable alloys and composite materials. To fulfil this responsibility, Diehl Metall relies on technically optimized production processes and directs its innovation activities toward future trends.
