# GET TO KNOW DIEHL CONTROLS

Diehl Controls is a worldwide leading supplier in the appliance industry. With over 70 years of experience, more than 3,500 employees and annual sales of around 500 million euros, we are today delivering millions of electronic systems. Our products are used worldwide in washing machines, heat pumps, refrigerators and battery systems, for example.

We develop and manufacture products, for our customers, according to their individual wishes. In doing so, we fulfil both in development and in production the highest standards – and our solutions help every customer to move forward quickly.

With this in mind, we have been implementing highly successful inverters with key players from the HVAC/R sector since 2009. In addition, we support our customers advance by digitizing their products and services with new Industrial IoT solutions. We are proud that our technical solutions are convincing and that our customers confirm our excellent price-performance ratio.

## WE DEVELOP TOMORROW'S TECHNOLOGY SOLUTIONS

Our customer focus means we develop and manufacture products specifically for you. Our aim is to implement tomorrow's technologies today – boosting both your technological level and your business success.

We either analyze your existing product or cooperate closely with you to develop a new solution – you decide. Naturally, we use the top

hardware and software platforms available.

At the same time, one of our principles at Diehl Controls is to design your product so it gives you the best price-performance ratio. You can also rely on exceptional flexibility, whether you want a few hundred or up to several million units. And you benefit from short distances: Our experts are there for you at our locations in Germany, Poland, China, Mexico, and the USA.

## IT STARTS WITH YOUR PROTOTYPE

Check out the video for an impression of our new 3SENSE technology prototype – and contact us directly so we can develop the right prototype for you.
