APPLICATION

The IZAR OH BT 3 is a practicable tool for configuring and reading Diehl Metering meters and system components via an optical interface (IrDa or ZVEI).

The integrated magnet and the shape of the optical head allow easy attachment and hands-free use for Diehl Metering products. The opto head then transmits the data to IZAR@MOBILE 2 (v2.12.8 or above necessary) over Bluetooth® Low Energy (BLE).

With an operating time of up to 16 hours and the supplied wrist strap, the IZAR OH BT 3 is designed for mobile operation. The battery and transmission status is displayed via LEDs. The IZAR OH BT 3 can be recharged within 6 hours via USB-C.

The opto head complies with protection class IP54. A protective cover for the IZAR OH BT 3 can be purchased as an option.

FEATURES

- ▶ Combined IrDa and ZVEI interface
