## PULSE EMITTER

**DIEHL**  
Metering

### APPLICATION

IZAR PULSE i is a pulse emitter that can be clipped onto all the water meters of the Diehl Metering inductive modular range (Ti) making them communicative in a very easy way.

IZAR PULSE i generates pulses to manage the water volume and features fraud alarms. It can be connected to remote reading or consumption analysis systems. IZAR PULSE i features a clamping ring for secured fixing and easy re-mounting on another meter.

### FEATURES

- ▶ Compatible with inductive modularity "Ti"
- ▶ 3 and 4-wires versions available
- ▶ Several configurations possible on request
- ▶ Flow direction management
- ▶ Tampering alarms
- ▶ Open collector output
- ▶ Available in dry-contact version, specific pulse weights and 3-output version
- ▶ Up to 15 years lifetime

## PULSE EMITTER

### OPERATING PRINCIPLE

IZAR PULSE i is a ring equipped with a sensor based on the inductive principle and with a specific electronic system that exploits the information to be transmitted in the form of an open-collector signal (polarised).  
The inductive system featured in IZAR PULSE i is actuated using a metal 1/2 disc located in the Diehl Metering modular register of the water meter.
