IZAR@MOBILE 2
Discover mobile reading. As quick as a flash.

Diehl Metering has developed and adapted the new IZAR@MOBILE 2 software especially for the daily challenges faced by water and energy suppliers.

**Simply work more efficiently.**
Read all meters for water, thermal energy, gas and electricity by simply driving by. The IZAR@MOBILE 2 software adapts to your individual style. Complete all the work steps involved in meter reading on the go.

**Your benefits:**
- no appointments necessary
- costs saved in the reading process
- walk-by or drive-by reading
- simple touch operation on the IZAR@MOBILE 2 TABLET
- configuration of Diehl Metering meters and system terminals

**Optimise all processes.**
IZAR@MOBILE 2 can be operated fully autonomously as a low-cost starter model. Thanks to standardised Excel export in XLSX format, meter reading tours can be exchanged directly with billing systems.

In conjunction with our IZAR PLUS portal or IZAR@NET 2 software from Diehl Metering, this results in considerable added value: configuration profiles and tours can be centrally planned, managed and sent to different mobile devices. All data can be encrypted with the central data management software at the push of a button and synchronised with mobile reading devices.

Do you wish to experience the software “live”? Make an appointment with your consultant at Diehl Metering!
