ELECTROMAGNETIC FLOW SENSOR

**DIEHL**  
Metering

## APPLICATION

PROMAG is an electromagnetic flowmeter designed for measuring heating water or any other type of conductive liquids used in air conditioning systems. It is characterized by high measuring accuracy and extended measuring range. Free of any moving parts, PROMAG offers a wide range of original technical solutions to suit various applications, such as glycol water measurement at  $-40^{\circ}\text{C}$  to overheated water at  $+130^{\circ}\text{C}$ .

Combined with a CALEC ST II or SCYLAR INT 8 calculator, PROMAG is, all year round, the ideal hydraulic part of energy measurement.

## FEATURES

- ▶ All liquids measurement with a conductivity  $> 50 \mu\text{S}/\text{cm}$
- ▶ No mechanical moving part
- ▶ Process temperature range:  $-40^{\circ}\text{C}$  to  $+130^{\circ}\text{C}$
- ▶ Very low pressure drop
- ▶ Pulse output and analogue output 4 ... 20 mA
