

**Diehl Metall: Active in Research**

How much does the German economy invest in research and development (R&D)? And what impact does this have on the sustainability of the country? These and other questions are dealt with by the “Stifterverband Deutsche Wissenschaft” (German Science Association) on behalf of the Federal Ministry of Education and Research. Based on those results, the association regularly honors companies engaged in research in order to highlight their special research efforts.

For the third time in a row, Diehl Metall (Röthenbach location) also receives the "Innovativ durch Forschung" (innovative with research) seal for its special research activities. The company actively invests in future-oriented ideas driving technological progress forward. Last year, the Diehl Group invested a total of EUR 307 million in research and development activities – the trend is rising.

**About Diehl Metall:**

Diehl Metall, is a Corporate Division of the Diehl Group founded in 1902 (sales: 3.8 million euros, number of employees: 17,173) and is headquartered in Röthenbach a.d. Pegnitz near Nuremberg, The company offers a broad spectrum of innovative products and technologies in the area of metal processing. In a global production network with locations in Europe, Asia, South America and the US, the technology driven company develops application-oriented solutions for international customers.

Diehl Metall also places great value on recyclable alloys and composite materials. To fulfil this responsibility, the company relies on technically optimized production processes and directs innovation activities toward future trends.
