

## **Stanztec 2024: Diehl ensures maximum precision in stamping technology and power in electromobility**

**In June 2024, Diehl Metall will once again be represented at Stanztec, the trade fair for stamping technology, presenting technologies from the fields of electroplating, stamping, press-fit and overmoulding technology.**

This year's Stanztec will take place from 25 to 27 June 2024 at the Congress Centrum in Pforzheim. Diehl Metal Applications (DMA), a Diehl Metall company, will be exhibiting again this year. With a wide range of state-of-the-art electroplating processes, DMA offers customized solutions at the cutting edge of technology. With state-of-the-art stamping presses, in-house toolmaking and design, Diehl Metal Applications offers precision stamping technology for the most demanding stamped parts in large quantities.

### **Global leader in electroplated coatings**

Diehl Metal Applications is one of the world's leading companies for electroplating and supplies customized solutions according to the latest technological standards. With a wide range of state-of-the-art electroplating processes, the highest requirements for wear resistance, solderability, corrosion resistance and conductivity are met.

### **Precision in punching technology**

The functional reliability and manufacturing quality of the end product are largely determined by the punching technology. With a large number of state-of-the-art automatic punching presses and highly developed production processes, DMA focuses on uncompromising precision, supported by optical, electronic and acoustic monitoring.

**Convince yourself of the extensive product and service portfolio. You will find Diehl Metal Applications at Stanztec in Hall GS, Booth A34. The entire team is looking forward to your visit and to exchanging ideas with you.**

**About Diehl Metall:**

About Diehl Metall: Diehl Metall is a Corporate Division of the Diehl Group founded in 1902 (sales: 3.5 billion euros, employees: 16,550) and has its headquarters in Röthenbach a.d. Pegnitz near Nuremberg. The company offers a broad spectrum of innovative products and technologies in the area of metal processing. In a global production network with locations in Europe, Asia, South America and the US, Diehl Metall develops application-oriented solutions for international customers. The company assumes responsibility in the area of climate and resource protection, and places great value on recyclable alloys and composite materials. To fulfil this responsibility, Diehl Metall relies on technically optimized production processes and directs its innovation activities toward future trends.
