

SPACE³

**SPACE OPTIMIZED. MODULAR.
AFFORDABLE.**

CHARACTERISTICS

The Space³ optimizes aircraft cabin space by adding more lavatory units and up to four additional seats. In terms of accessibility, the PRM Mode connects two lateral lavatories with a middle door, ensuring seamless wheelchair access. The wide front doors allow comfortable entry for passengers using wheelchairs, and the system is DOT compatible. Additionally, it offers fully touchless operation for enhanced hygiene and specially designed handholds.

BENEFITS

- Highly robust housing, designed to withstand 10 years of heavy duty
- Modular system with late changes to configuration possible and high re-use of parts
- Weight and space optimized units, designed with the airline in mind
- Possibility to save a further seating row, as compared to a classic single lateral PRM lavatory
