# MAKE IT WORK

## Embedded Software Development Manager (k/m/n)

### These are your tasks:

- Technical and disciplinary leadership of the embedded software development team (>30 FTE).
- Ensure state-of-the-art embedded software development and foster cross-team collaboration, including beyond the product development team.
- Coordinate and plan further software developments, including enhancements of existing solutions, new standard embedded software developments, and customer-specific software solutions.
- Oversee project-related goals, including project scope, budget, and schedule management.
- Evaluate team and individual software development results and provide support in project execution.
- Select appropriate and state-of-the-art tools and agile methodologies to enhance efficiency in embedded software development.
- Drive the strategic development of the software department, processes, and organizational structure.

### Who we are looking for:

- Degree in Software Engineering, Computer Science, or a related field.
- Several years of professional experience in embedded software development, combined with strong leadership and management experience as a software team leader, project manager, or product owner in the embedded software domain.
- Strong knowledge and experience in embedded software technologies and electronics development.
- Responsible, reliable, and a strong team player with cross-functional collaboration skills.
- Excellent written and spoken English skills (German language skills are an advantage).
