

"I particularly enjoy the **variety**.
Things stay exciting and one has many
opportunities to continue growing."

MAKE IT WORK

EFFICIENT

Head of System Integration Cabin (m/w/d)

These are your tasks:

- You are responsible for the line & professional management of the System Integration Cabin team
- You are responsible for the planning, coordination and provision of the necessary capacities and skills, as well as the integration of internal and external development service providers.
- You support the objectives of the department and you are responsible for the execution of team targets including the initialization and implementation of improvement measures.
- Establishing and further developing of standards, processes, methods and tools within the area of responsibility based on the team KPIs are also part of your tasks.
- Further development and motivation of employees.

Who we are looking for:

- You have a successfully completed university degree in electrical engineering or natural sciences or a successfully completed technical degree in a STEM field or comparable qualification.
- You have sound professional experience in the development & integration of electrical equipment as well as with oxygen systems and are familiar with the regulatory requirements (CS-25/FAR Part 25, Do-160, DO-254) with a focus on ATA Chapters 92 and 35.
- You have extensive knowledge and skills in managing, motivating and developing employees (> 3 years).
- You promote teamwork as well as open and constructive communication between employees.
- You have strong project management skills and experience in budget planning and resource management.
