

"I particularly enjoy the **variety**.
Things stay exciting and one has many
opportunities to continue growing."

MAKE IT WORK EFFICIENT

Senior Frontend Engineer (React/TypeScript)

These are your tasks:

- Develop and maintain high-quality, maintainable frontend code with a strong focus on quality and performance while delivering an excellent user experience.
- Lead the implementation of new features, managing the full lifecycle from technical design through deployment.
- Collaborate effectively with fellow developers and designers to translate product requirements into clean, functional, and user-friendly interfaces.
- Continuously improve the codebase through refactoring, thoughtful abstractions, and conducting consistent, constructive code reviews.
- Drive the evolution of the frontend architecture and champion best practices in coding, testing, and documentation.

Who we are looking for:

- You have completed a university degree in an IT-related field such as computer science or have relevant experience that demonstrates comparable skills.
- You bring five or more years of professional experience in frontend development.
- Proven experience building modern web applications using frontend frameworks and component-based architectures.
- Strong hands on experience with modern frontend technologies and tools, including TypeScript, React, Redux, Nx and Vite/Vitest.
- A strong sense of code quality, with a track record of writing clean, testable, and well-documented code.
- Proven ability to enhance application performance and apply industry best practices.
- Excellent communication skills in English, with strong problem-solving and analytical abilities.
