MAKE IT WORK SMARTER

Power Platform & Automation Developer GSC-IT (m/w/d)

These are your tasks:

- Develop and operate a Microsoft-based Self-Service Automation Platform.

- Design, implement, and maintain the platform's Governance Model.

- Collaborate closely with the Group-IT Microsoft Application Infrastructure Service.

- Ensure the platform follows global IT standards and security requirements.

- Guarantee the platform's scalability, stability, and user-friendliness.

- Enable business units to automate processes independently within a governed framework.

Who we are looking for:

- Proven expertise in Microsoft Power Platform, including Power Automate, Power Apps, and AI Builder.

- Comprehensive knowledge of Azure Services such as Data Factory, Azure Functions, Azure Databricks, and Microsoft Fabric.

- Proven track record in RPA technologies, particularly Power Automate Desktop and UIPath.

- Strong proficiency in interface management, including REST APIs, Dataverse, SQL, and SharePoint.

- Minimum of 3 years of experience in operating, maintaining, and monitoring automation platforms.

- Demonstrated ability to design and implement governance models for Citizen Development platforms.

- Solid understanding of Microsoft access and security structures (Azure AD, RBAC) and familiarity with IT security, compliance, and GDPR requirements.

- Excellent command of English (spoken and written); German is considered an asset.

- Highly self-organized and reliable, with the ability to work effectively in a remote and cross-functional environment.

- Experience in change management, including developing training materials and implementing train-the-trainer concepts.
