Data Analyst Quality (m/f/d)

These are your tasks:

- You define and run Meter Data Analytics models in case of customer claim, to decrease the amount of parts to be exchanged in the field.

- You define and run predictive Data Analytics model based on our Izar plus portal.

- You define and implement Data Analytics models to digitize claim management process.

- You create Power BI reports and dashboards for data visualization and to support technical discussions.

Who we are looking for:

- You have a Master's degree in Data Science, Statistics, Mathematic, Computer Science or a related field combined with strong computational engineering skills for applying analytical and technical methods effectively.

- You have a basic understanding of Machine Learning concepts.

- You have excellent skills in communication, interaction, teamwork, and also intercultural skills, enabling effective collaboration in diverse teams.

- You are fluent in English and German.
