

"There are **new challenges** that I can tackle everyday to continually improve things."

# MAKE IT WORK

# SMARTER

## Senior IT Architect (m/f/d)

### These are your tasks:

- You will lead IT projects and develop on-prem as well as cloud infrastructures aligned with Enterprise Architecture standards.
- You will design and optimize IT system architectures (application, data, infrastructure, security) and ensure continuous improvement of the IT landscape.
- You will consult internally on state-of-the-art technologies and evaluate infrastructure performance, scalability, cost efficiency and IT security.
- You will manage integration and migration activities, including external business partners and virtual environment implementations.
- You will create architectural documentation and IT architecture blueprints aligned with Enterprise Architecture.

### Who we are looking for:

- You have strong IT expertise in cloud technologies (AWS, Azure, hybrid and multi-cloud), IT security architectures as well as DevOps and automation practices (CI/CD, IaC).
- You bring solid project management experience and are confident working with both agile and traditional delivery approaches.
- You are experienced in business and process analysis and can translate business requirements into clear, feasible technical solutions.
- You have deep knowledge of software and infrastructure technologies, operating systems and modern network environments.
- You communicate fluently in English and are willing to travel internationally for project-related purposes.
