

"It is important to me that we can  
**shape our future in a sustainable way.**  
That is why I am with Diehl."

# MAKE IT WORK GREENER

## Validation and Test Engineer (m/w)

### These are your tasks:

- Define, plan, configure and execute tests according to given priorities and by incorporating specialized testing equipment (e.g. test benches, climate chambers).
- Check plausibility of test results and propose improvement actions.
- Prepare and maintain documentation such as test plans and test reports according to standards like ISTQB.
- Collaborate in technical change processes in close cooperation with Industrial Engineering, Quality and Production.

### Who we are looking for:

- Engineering degree in Mechatronics, Electrical Engineering or similar field.
- Professional experience in the environment of testing as well as a basic understanding of laws, regulations and standards, ideally in an international industry environment.
- Good communication, cooperation skills and the ability to work in an international setting.
- Strong conflict resolution and problem-solving skills.
- Fluent speaking & writing English (French / German will be an added value).
- Experience in test automation using environments like Robot Framework, PyTest is a plus.
