

"At Diehl, we combine tradition with innovation to provide **sustainable solutions** for our customers."

MAKE IT WORK SMARTER

IT Platform Engineer (m/w/d)

These are your tasks:

- Operate and continuously develop our GitHub platform and GitHub Actions.
- Design, implement, and maintain standardized CI/CD pipelines.
- Define and manage platform concepts such as self-hosted runners and development environments.
- Ensure that automation and source code management are technically aligned with the overall engineering tools landscape.
- Proactively identify automation needs, prepare solution proposals, and implement agreed improvements.
- Support the gradual expansion of automation towards engineering product data (ECTR).
- Apply CI/CD principles to engineering product data and structures (e.g., deployment, CAD conversion).
- Support the automation of engineering change and release processes, including versioning and status transitions.
- Contribute to automation concepts across MCAD and ECAD environments.
- Participate in dedicated MCAD system update projects.

Who we are looking for:

- A professional with strong experience in Git and GitHub.
- Hands-on experience in building and maintaining CI/CD pipelines (e.g., GitHub Actions or similar tools).
- Solid understanding of automation, scripting, and platform operations.
- Experienced in working with Linux-based environments.
- Ability to document technical and operational concepts clearly
- Experience in engineering or industrial IT environments will be considered an advantage.

Work location: Wrocław

Job Level: Professional
