

"I want to make a **difference in the world**.  
Due to my engineering skills,  
I can pursue this goal at Diehl."

# MAKE IT WORK BETTER

## AI and Analytics Engineer (Manufacturing) m/w/d

### These are your tasks:

- Develop and support dashboards, reports, and monitoring use cases.
- Identify and realize high-value analytics and AI use cases.
- Build and manage automation workflows (e.g., n8n or similar tools).
- Act as a change agent to drive adoption across production teams.
- Gather and document requirements and translate them into technical solutions.

### Who we are looking for:

- Proven experience in AI, BI or Data Analytics and SQL.
- Strong skills in data visualization and requirements engineering.
- Strong analytical and problem-solving skills.
- Fluent English.
- Degree in IT or comparable qualification.
- Knowledge in Machine Learning / AI implementation.
- Knowledge of data acquisition and BI development (Splunk preferred).
- AI/ML development or automation experience.
- Understanding of manufacturing data and processes.
