

"It is important to me that we continue to be a **technological leader** in the future. That's why I am with Diehl."

MAKE IT WORK

Hardware Engineer in Test Systems (m/w/d)

These are your tasks:

- Design system architecture for automated test equipment for our Diehl Controls production.
- Translate product requirements into technical solutions and testing concepts.
- Coordinate hardware, software, and mechanical integration across teams.
- Define system interfaces and ensure scalable, reliable solutions.
- Ensure compliance with quality, safety, and engineering standards.
- Maintain technical documentation and support continuous platform improvements.

Who we are looking for:

- Degree in Electrical Engineering, Mechatronics, Computer Engineering, or a related field.
- Experience in developing automated test equipment or complex technical systems.
- Strong knowledge of electronics, measurement technology, and system architecture.
- Ability to solve complex technical challenges and make independent decisions.
- Excellent communication and cross-functional collaboration skills.
- Structured, quality-focused, and solution-oriented mindset.
- Very good English communication skills.
