

"It is important to me that we continue to be a **technological leader** in the future. That's why I am with Diehl."

MAKE IT WORK

FCT Technology Leader (m/w/d)

These are your tasks:

- Lead and coordinate activities related to computer-based production and test systems, ensuring reliability and availability for manufacturing.
- Manage the technical system architecture, maintenance and continuous improvement of FCT test platforms and related infrastructure.
- Develop, optimize and validate automated test and measurement solutions supporting production processes and quality requirements.
- Lead FCT-related projects and technical initiatives, including integration of Software Libraries and support for rollout activities.
- Collaborate closely with cross-functional engineering and production teams, providing expert support to the Head of Test Systems and acting as a technical advisor in your domain.

Who we are looking for:

- Degree in Electronics Engineering or a related technical field, with experience in industrial or production environments.
- Proven experience in technical system management, especially computer-based production or test systems.
- Strong programming skills in LabVIEW, **TestStand** and C#, including experience with software integration testing and validation processes.
- Ability to coordinate technical activities, manage multiple priorities and drive issues to resolution in a structured way.
- Strong analytical, problem-solving and communication skills, with a good understanding of industrial production processes and test systems, and very good command of English (spoken and written).
- Working in a global / international business environment.
